A common dwelling rents for from 8 to 12 dollars per month. Taking the average rent, \$120 a year, on a house that cost five hundred dollars, is certainly a good per cent. on the money invested in the building; and besides, every new building that is put up cubances the price of oth-

WASHINGTON NEWS.

The story of last week in regard to the disgraceful scene at the White House between the President and Ross, seems to have had no foundation. It is true that the President declined to do what Ross desired in regard to certain Kansas appointments; but there was only an earnest prosecution of a case on the one hand, and a firm refusal on the other, and all couched in proper language.

The appointing machine is still grinding out a long list every day. Among the recent appointments, we notice the name of James Hunter, of St. Joseph, as P. M. of that city.

The turning out of office also contin ues. One hundred and thirty-five clerks in the Auditor's Office have been notified that they were no longer needed.

It is the present understanding that President Grant, under the authority of law, will issue a proclamation at an early day, submitting to the people of Virginia the Constitution of that State, with the separate clauses. First, as to disfrauchisement; second, as to the test oaths, and third, as to the county organizations. It is also understood that the vote will be ordered for the fourth Tuesday in May. A new registration of voters is to be made.

I tell you, Mr. Editor, any man with one thimbleful of brains who rides up met at Graham to effect an organization itable. Here we have a valley averagviding ridges to the stream on either side gradually sloping. The soil equaling in fertility any on earth; the scenery of unsurpassed beauty: springs of limpid and pure water on almost every quarter section of land ; beautiful groves of timber frequent; coal from Quitman Jones and R. C. Bohart, were appointed in Nodaway county, north, abundant, and added to all these natural advantages a population which is as good as any to be found in the west. Now, citizens of Oregon, one united effort will save us. Thirty thousand dollars from points south of Duncau's mill will grade and tie the road from Mackoy's Elevator to the valley of the Nodaway. We can afford to pay three times that price and not feel it. Why, a tax upon the city of Oregon of fifty thousand could be paid easily. We raised twelve thousand for a switch scheme that would have been of far less benefit to us. Now let us raise this thirty thousand dollars.

Somebody must move in this matter. Who will be the man? The writer unfortunately belongs to the sans cullotts or he would move; let some man go to work and the thing can be done. RAILROAD.
